

# Webpack sourcemap flag extraction

1. Load the challenge page in Chrome or Firefox.
2. Open DevTools ( F12 ).

## Enable source maps

DevTools → Settings (gear) → **Sources** → enable:

- “Enable JavaScript source maps”
- “Enable CSS source maps”

## Find the main JS bundle

1. DevTools → **Network** tab.
2. Reload the page ( Ctrl+R ).
3. Filter by **JS**.
4. Locate the main bundle ( app.<hash>.js or similar).
5. Click that request and copy the **Request URL** (exact).  
Example:

## Locate the sourceMap name
